POLY AL FOIL (Gloss)

Metalized Poly (gloss) is a three-layer film structure with 48-gauge biaxially oriented polyester (PET12) as the outer print layer. The second layer is 7-micron aluminum foil, the highest barrier flexible film with nearly 100% barrier against oxygen, moisture, and light. The innermost layer is heat sealable Linear Low Density Polyethylene (LLDPE), which provides shape and rigidity to the pouch.

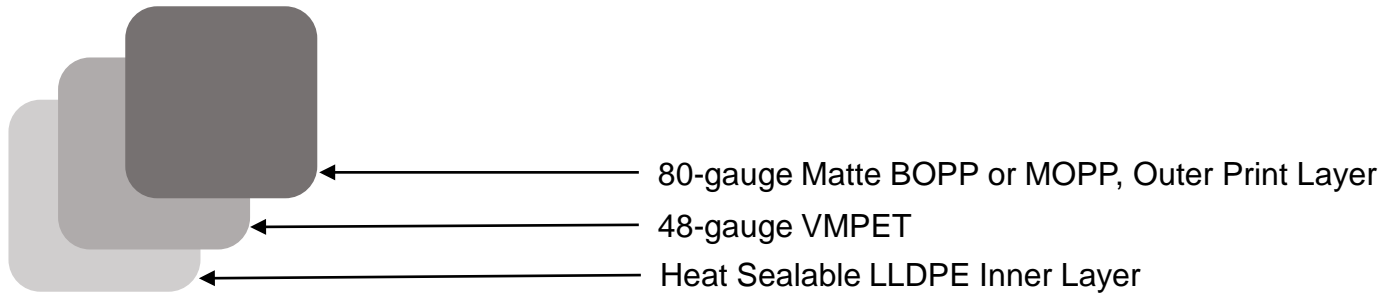

Commonly used for: *Snacks, Supplements, Protein Powders, Pharmaceuticals, Health Foods, Pet Food, etc.*

Appearance: *Frosty but transparent due to a matte external finish. Ideal for pouches requiring both a window knockout and matte finish.*
